CORPORATE OVERVIEW

FTS Lighting Services is a progressive, fast growing third-generation company dedicated to providing energy efficient and cost-effective lighting solutions. We are committed to preserving and maintaining a clean and safe environment with our recycling products and services. FTS provides the best environmentally sustainable energy and waste solutions, emphasizing the recovery of products from waste to help preserve diminishing resources. We strive daily to meet and exceed our customers' expectations with the highest quality professional services, guaranteed customer care and satisfaction. We employ individuals who are all equally dedicated to our company's vision.

FTS specializes in the latest LED lighting, landscape lighting, interior/exterior lighting, general lighting, motion control and sensors. We provide Lighting Design, Installation and Retrofitting along with assistance in Utility Rebate and Energy Saving Analysis. Our products meet all required Federal, State and Utility Regulations, including California's Title 24, along with the strict guidelines of federal regulation.

COMPANY HISTORY

*Bernard Patton
circa 1940's*

Our company was founded by Bernard Patton in the late 1940's as Fluorescent Tube Service & Exchange Company, Inc. Bernard Patton invented the machine that rejuvenated fluorescent light bulbs. Against the conception of researchers and engineers, the company was formed well ahead of its time in the world of recycling and energy saving.

As Bernard battled illness, his wife Dorothy came to the forefront and took the reins. With perseverance, charge and influence, she became a pioneer of her own in the early 1950's as a woman-owned full wholesale lighting distributor representing top manufacturers such as General Electric, Sylvania and Westinghouse.

Dorothy's granddaughter, Michele, began working under her tutelage; and in 1979, Dorothy's health dictated that she pass the torch on to Michele, who would take the concept and progress of the business into the future.

Your ONE SOURCE to ALL of Your Lighting, Recycling & Electrical Needs!

Cost Effective / Energy Efficient / Sustainable Solutions
